General Technical Information

Industrial Plugs & Sockets to IEC 60309 Rated Operation Voltage > 50 V Clock face position

Viewing the socket from the front, the clock face position is established by observing the position of the earth contact with respect to the major keyway, which is always situated at 6 O' clock. The different voltage ratings are identified by conventional colour codes.

Clock Reference

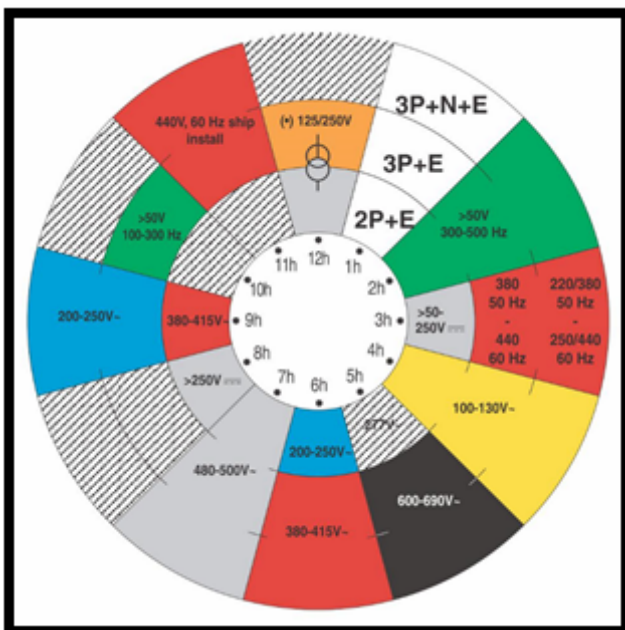

All the versions required by the IEC 60309 Standard are available, including the more specific.

Examples

All the versions required by the IEC 60309 Standard are available, including the more specific.

- Standard use **6 h**
- Refrigerated container **3 h**
- Marine, port or ship installation **11 h**
- Direct current (2P+E) **3 h & 8 h**
- Supply by isolation transformer (TST) **12 h**
- High frequency, from 100 to 300 Hz **10 h**
- High frequency, from 300 to 500 Hz **2 h**
- Specific Voltage 100-130V **4 h**
- Specific Voltage 480-500V **7 h**
- Specific Voltage 600-690V **5 h**

Clock Position - IEC ratings

(.) Only for Series II

Clock Diagram

Clock face position (h) of the earth pole of low Voltage (>50 V) industrial plugs & sockets IEC 60309-2 for different applications (polarity, voltage, frequency, current).

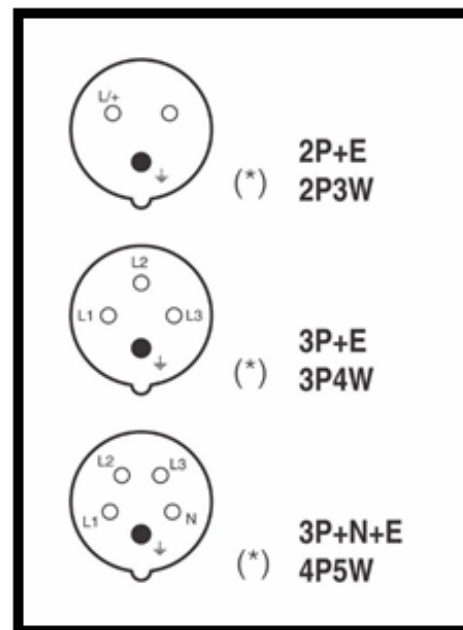

Colour Code

The operating voltages are identified by conventional colours as shown in the table.

Color		Rated operating Voltage V			
	Violet	From	20	To	25
	White	From	40	To	50
	Yellow	From	100	To	130
	Blue	From	200	To	250
	Red	From	380	To	480
	Black	From	500	To	690

Combinations of green with the colour of the rated operating voltage can be used to identify frequencies between 60 Hz and 500 Hz inclusive.
